Why are we doing this?

- IONYX and Gemstone share the same **philosophy, culture and entrepreneurial outlook**
- Both companies are **respected** in their field, and are **complementary to each other**
- An optimal mix of of-the-shelf and custom software capabilities means **any commercial opportunity can be satisfied**
- **Offering new products** to each others' client bases
- Utilising each others' footprint, expertise and geographic location to **enter new territories**
- Framework will allow product integration and for one party to act as the other's **in-continent representation** (e.g. attending production demonstrations, training, deployments etc.)

... and what about longer term?

Taking custom software designed for one client to the **mass market**

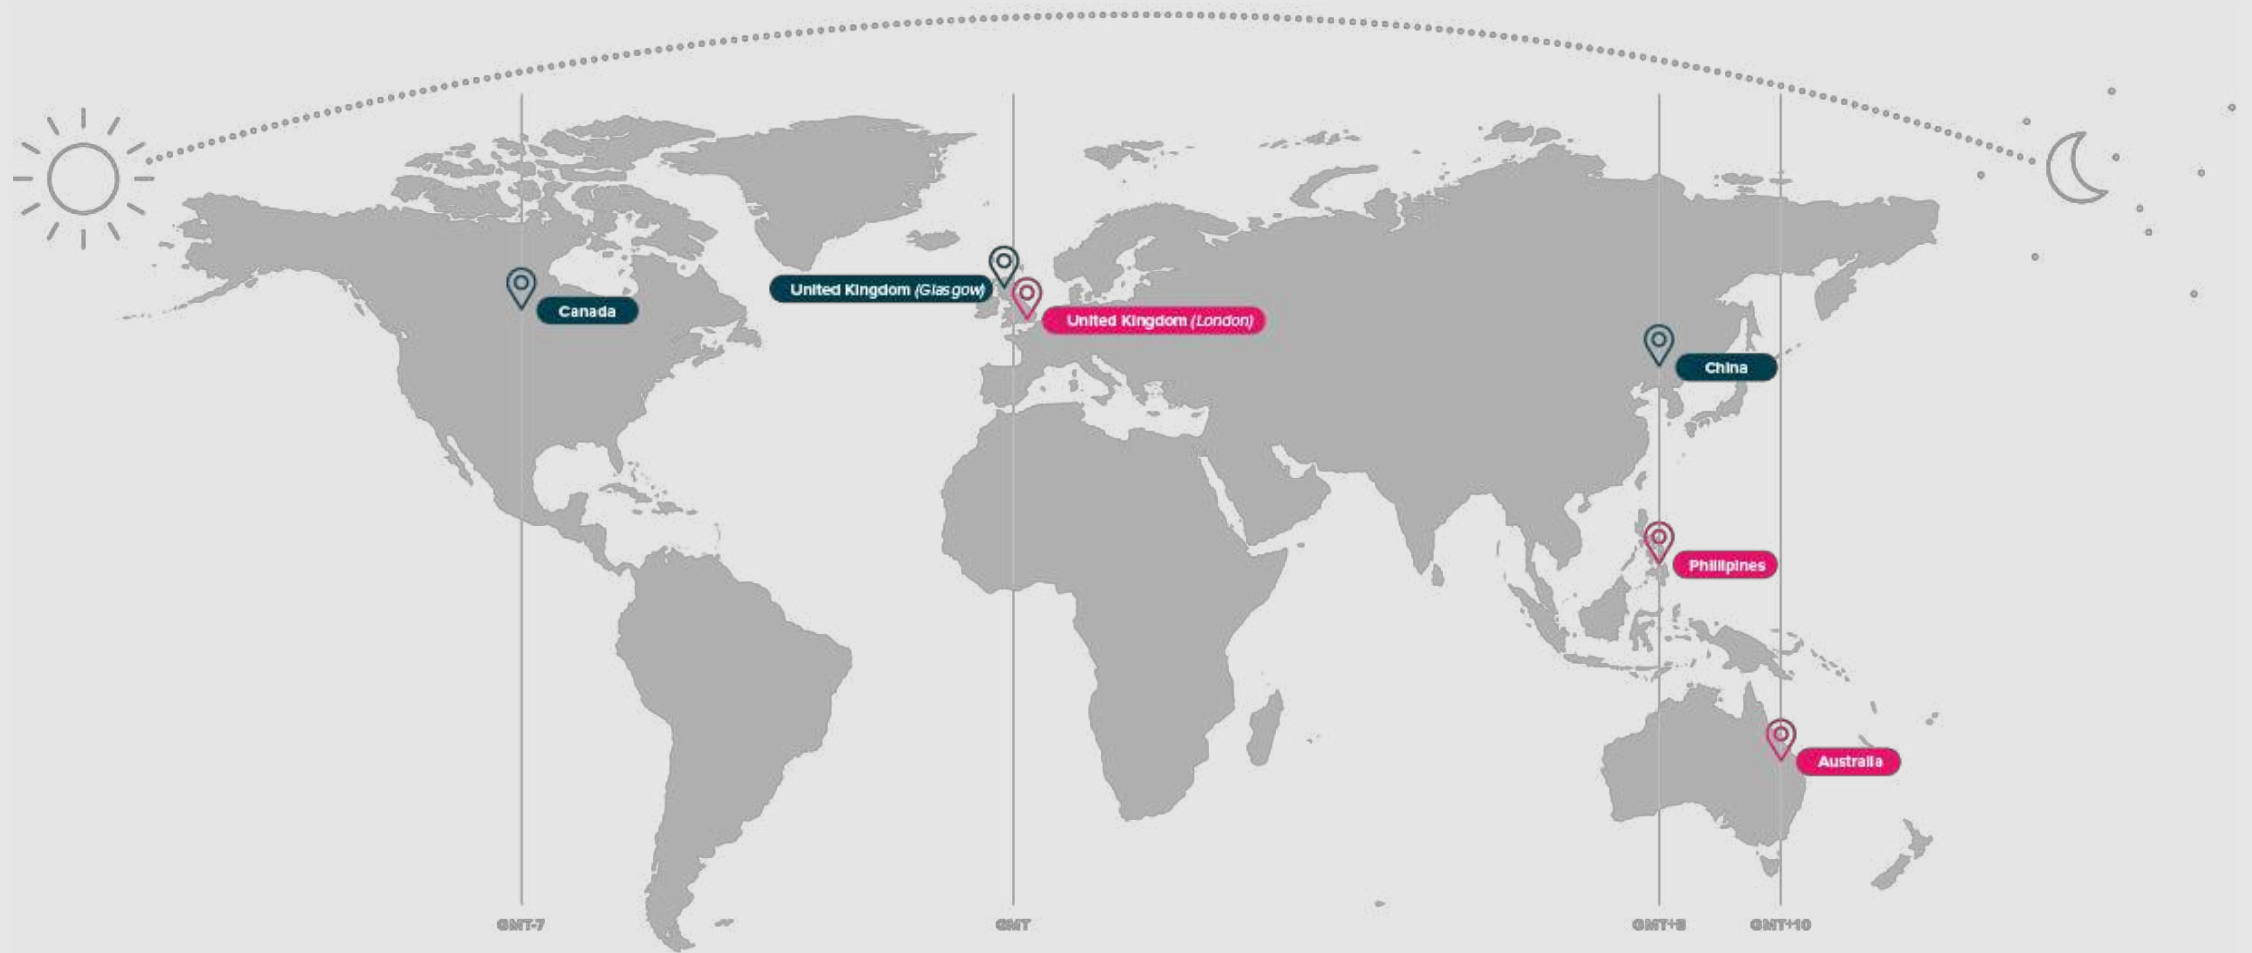

Establishing an Australian-based IATA accredited **travel agency**

Incorporating adjacent sectors (e.g. freight, permitting etc.)
